

Tata Projects Secures Landmark EPC Contract from GSFC for Integrated Phosphoric and Sulphuric Acid Complex at Sikka in Gujarat

Strengthens Tata Projects' position in India's chemicals and fertilisers sector through complex EPC excellence.

Mumbai, October 28, 2026: Tata Projects, one of India's leading technology-led engineering, procurement and construction (EPC) companies and a key member of the Tata Group, has secured a significant EPC contract from Gujarat State Fertilizers & Chemicals Limited (GSFC) for the development of an integrated Phosphoric Acid–Sulphuric Acid (PA–SA) complex at Sikka, Jamnagar, Gujarat. The contract marks an important milestone in Tata Projects' expansion into specialised process industries and reinforces its position as an EPC partner for complex industrial infrastructure.

The proposed complex will comprise a 600 metric tonnes per day (MTPD) phosphoric acid plant and a 1,800 MTPD sulphuric acid plant, along with associated utilities and offsite infrastructure. A key component of GSFC's strategic expansion and backward-integration programme, the project is designed to strengthen captive raw-material availability for phosphatic fertiliser production, reduce exposure to imported inputs and enhance long-term operational resilience.

For Tata Projects, the contract represents a strategic advancement in its process-industry business, further strengthening its capabilities in delivering technically demanding industrial facilities.

Rajiv Menon, President & Chief Growth & Strategy Officer, Tata Projects, added, *"Built on sustained engagement with GSFC, the award demonstrates our ability to compete for and secure complex industrial projects through differentiated solutions and a compelling value proposition. As we expand our presence in chemicals, fertilisers and other specialised process industries, our priority remains to build a high-quality, diversified order book anchored in technical expertise, execution credibility and enduring customer partnerships."*

The scope of the project involves the integrated development of phosphoric acid and sulphuric acid manufacturing facilities, supported by the necessary utilities and offsite systems. Given the interdependent nature of these operations, successful delivery will require close coordination across engineering disciplines, procurement, construction planning and commissioning interfaces. Tata Projects' integrated EPC approach will be central to managing these complexities while ensuring efficient project delivery.

The award further advances Tata Projects' strategy of expanding its presence across high-value industrial segments, complementing its established capabilities in power, metals and mining, oil and gas, clean energy and advanced manufacturing. By strengthening its participation in the chemicals and fertilisers sector, the company aims to deepen its process-engineering expertise, diversify its industrial portfolio and create sustained value through technically differentiated EPC solutions.

About Tata Projects

Tata Projects is one of the most trusted Technology led Engineering, Procurement and Construction (EPC) companies in India. We have expertise in providing sustainable solutions in the execution of large and complex urban and industrial infrastructure projects while also demonstrating strong presence in refineries and petrochemical plants. We leverage our domain knowledge across various business segments to address the shift to clean energy to meet the nation's Net Zero ambitions.

We provide ready-to-deploy solutions for semiconductor facilities, giga factories, data centres, refineries, green fuels, roads, bridges, integrated rail & metro systems, commercial building & airports, power generation, transmission & distribution systems, chemical process plants, water & waste management, and mining & metal purification systems.

Tata Projects offers one stop service covering entire life cycle of the project, from project conceptualization to operations & maintenance. It uses innovative technology solutions to offer bouquet of services which includes engineering, procurement, construction, commissioning, inspection & expediting, operations, repairs & maintenance, and shutdown services. Over the years, Tata Projects has received several awards and recognitions for its project delivery and commitment to safety & quality.

We are a part of the TATA Group which operates in more than 160 countries across the globe, with a mission 'To improve the quality of life of the communities we serve globally, through long-term stakeholder value creation based on Leadership with Trust'. In 2025-26, the revenue of Tata companies, taken together, was \$185Billion. These companies collectively employ over 1Million people.
