Tata Projects-Led JV Wins Major Dhaka Metro Contract, Expanding Its Global Urban Transit Footprint

Strategic international award strengthens Tata Projects' credentials in complex underground metro infrastructure and opens pathways for wider participation in global urban transit markets.

Mumbai / Dhaka, November 12, 2026: Tata Projects Limited (TPL), as part of the Nishimatsu-TPL-Toda Joint Venture, has secured Contract Package CP06 from Dhaka Mass Transit Company Limited (DMTCL) for a key section of the Dhaka Metro network in Bangladesh.

The award validates the company's growing ability to collaborate with leading international infrastructure developers and execute technically demanding transit systems in global markets. As governments across the Middle East, Southeast Asia and South Asia accelerate investments in mass rapid transit and sustainable mobility infrastructure, the Dhaka Metro project strengthens Tata Projects' credentials as an integrated engineering and execution partner capable of delivering complex metro systems in partnership with global contractors and public-sector agencies.

The scope includes Civil Works including Architectural finishes, Mechanical Electrical, Plumbing (MEP) for the construction of the main line for an underground length of 5.2 kms and three (3) underground stations (Khilkhet Station, Airport Terminal-3 Station, Airport Station) with a shaft at the north endpoint, forming a critical component of Bangladesh's vision to modernize urban transportation, improve connectivity, reduce congestion and support sustainable economic growth in Dhaka.

The project is being implemented under funding support from the Japan International Cooperation Agency (JICA).

Rajiv Menon, President & Chief Growth & Strategy Officer, Tata Projects, added:

"The Dhaka Metro award is a significant milestone in our international growth journey. Beyond the immediate opportunity, it demonstrates Tata Projects' ability to work seamlessly within global consortium structures and deliver large-scale mass transit infrastructure to international standards. As urbanization drives unprecedented investments in metro and rail networks across the Middle East, Asia and emerging markets, we believe this project enhances our visibility as a reliable partner for governments, developers and international EPC companies seeking strong execution capabilities, engineering excellence and local delivery expertise."

Strong Metro Rail Credentials

Tata Projects has emerged as one of India's leading metro infrastructure builders, having delivered and executed complex underground and elevated metro projects across multiple Indian cities. Its metro portfolio includes the successful delivery of the Lucknow Underground Metro package ahead of schedule, major underground packages for the Pune Metro system and ongoing construction of underground corridors and stations for the Chennai Metro. The company's experience spans TBM tunnelling, underground station construction, elevated transit infrastructure, systems interfaces and execution in densely populated urban environments.

The Dhaka Metro contract marks an important step in Tata Projects' aspiration to expand its international transportation infrastructure portfolio. By combining deep engineering capabilities, proven urban transit execution experience and the strength of the Tata Group, Tata Projects is increasingly well-positioned to participate in the next generation of metro and rail investments being undertaken across Saudi Arabia, the UAE, Qatar, Oman and other rapidly urbanizing economies.

About Tata Projects

Tata Projects is one of the most trusted Technology led Engineering, Procurement and Construction (EPC) companies in India. We have expertise in providing sustainable solutions in the execution of large and complex urban and industrial infrastructure projects while also demonstrating strong presence in refineries and petrochemical plants. We leverage our domain knowledge across various business segments to address the shift to clean energy to meet the nation's Net Zero ambitions.

We provide ready-to-deploy solutions for semiconductor facilities, giga factories, data centers, refineries, green fuels, roads, bridges, integrated rail & metro systems, commercial building & airports, power generation, transmission & distribution systems, chemical process plants, water & waste management, and mining & metal purification systems.

Tata Projects offers one stop service covering entire life cycle of the project, from project conceptualization to operations & maintenance. It uses innovative technology solutions to offer bouquet of services which includes engineering, procurement, construction, commissioning, inspection & expediting, operations, repairs & maintenance, and shutdown services. Over the years, Tata Projects has received several awards and recognitions for its project delivery and commitment to safety & quality.

We are a part of the TATA Group which operates in more than 160 countries across the globe, with a mission 'To improve the quality of life of the communities we serve globally, through long-term stakeholder value creation based on Leadership with Trust'. In 2025-26, the revenue of Tata companies, taken together, was $185Billion. These companies collectively employ over 1Million people.
