

## Tata Projects Wins 2 Important Mumbai Metro Package

**Hyderabad, India (April 13, 2018):** The Joint Venture of TATA Projects Limited – China Harbour Engineering Company (TPL-CHEC) today received the LoA (Letter of Award) for the constructing of two packages of the Mumbai Metro Elevated Line 4. The packages lie on the line extending between Wadala & Kasaradavali. The combined value of both packages is INR 1048 Crores and requires the contractor to design and construct 14 elevated stations with a viaduct of 12.5 kms. This project will improve connectivity with Thane.

The project is challenging as it involves construction in highly congested locations as well as management of logistics for transportation and erection of heavy girders. Tata Projects has successfully completed a similar job in the National Capital Region with Delhi Metro Rail Corporation and is well accustomed to the required engineering techniques whilst possessing in-house best in class workforce to ensure safe and sound operations.

Mr Vivek Singhal COO Urban Infrastructure, Tata Projects Limited said, “The company has been awarded 2 important Mumbai Metro packages. We are happy to contribute to Mumbai’s transformation by building both underground and overground stretches of Mumbai Metro”

This strengthens Tata Projects Limited’s metro portfolio in the Mumbai Metropolitan Region together with the on-going underground metro works in South Mumbai. The company is now executing 6 metro packages across the country.
